

MY COUNTRY - SLOVAKIA

I think, Slovakia is very beautiful country. There are many beautiful places like High Tatras, lakes, forests, rivers and other beautiful nature places. There are many castles too. For example, we have Smolenice castle, Bratislava castle, Orava castle, Bojnice, Červený kameň and other castles. We have beautiful caves too. The weather in Slovakia is nice, but we have short autumn and spring. The hottest city in summer is Štúrovo. Štúrovo is in the south. In Slovakia it rains not very often. In summer is sunny, hot and dry weather. We can go to swim to

swimming pools or do sports like tennis, cycling or roll-skating. Winter in Slovakia is beautiful too. It often snows and is very windy. I like winter sports too, for example ice-skating. I can't ski. But in winter there are many cars' crashes too.

The most beautiful place to visit in summer is Dobšinská ľadová

jaskyňa. The best place to visit in winter is High Tatras. Spring and autumn are short, but they're nice too. In spring there are many beautiful flowers and in autumn we can play with a kite. In spring we can travel to historical places, like Gerulata or Čachtice.

So Slovakia is very beautiful place, where we can do many activities.
