

About Slovakia

In my opinion Slovakia is the fourth most interesting country in the Europe. In Slovakia is many places what can tourists visit. For example: High Tatras, Low Tatras or many castles. In my opinion there are the interesting castles too: Bratislava castle, Trenčín castle and Čachtice castle etc. Through Bratislava flows river Danube. We can see in Bratislava some interesting places too: Devín, Starý most, Nový most, Most Apollo etc. New bridge is very nice bridge but I think Apollo is nicer than Nový most. Nový most has one high tower. This tower we are called „UFO.“ In Ufo is a restaurant, but this restaurant is very expensive. The capital city of Slovakia is Bratislava and Bratislava is the biggest city of Slovakia too. The largest city is Košice and the third is Prešov. The oldest city of Slovakia is Nitra. I was born in the second oldest city. It is Trnava. We called this city „Slovenský Rím.“ In my opinion Slovakia is more interesting than Czech Republic. Austria, The Czech Republic, Hungary, Ukraine and Poland are neighbouring states of Slovakia.
